

Questions to find your personal story

1. Where were you born and raised?

How does that shape the way you see the world?

2. Who are your parents?

If you would have to describe them as characters, what comes to your mind?

3. What have you studied?

That is not necessarily what you studied at school or university, but the subjects you're most curious about, the things you like the most and you "geek out" on.

4. How can the three first questions explain the quest that you're on?

What is your quest, riddle, destination, purpose or your "why"?
